

THE FUTURE OF BATHROOMS IS HERE!

BATHWARE COLLECTION

Faucets | Sanitaryware | Showers | Kitchen Sinks

Pricelist February 2026

A modern bathroom with a shower, toilet, and sink, overlooking a lush forest and a river. The shower is a large, rain-style showerhead mounted on a concrete wall. The toilet is a white, wall-mounted unit. The sink is a white, rectangular vessel sink on a concrete countertop. The view through the window shows a river flowing through a dense forest, with mountains in the background.

JOHNSON BATHWARE

H&R Johnson India is among the country's leading brands in tiles and bathroom solutions, known for its commitment to design innovation and product excellence. Building on this legacy, Johnson Bathrooms was created as a dedicated division focused exclusively on advanced bathroom products and integrated solutions.

Established in 1998, the Johnson Bath Division was founded with a clear promise of delivering innovative, high quality products supported by dependable and timely supply across a strong nationwide distribution network. Over the years, the division has grown into a trusted name for performance driven and design led bathroom offerings.

The brand operates two state of the art faucet manufacturing facilities at Baddi and Samba, with a combined production capacity of 1.6 million pieces per annum. These units are equipped with modern machinery, in house research and development, and comprehensive testing infrastructure to ensure consistent quality and reliability across every product.

Chrome Plated Products

Dirty Taps cause bathrooms to appear dingy and neglected. Exposure to dirt, body oils and soap cause taps to develop a filmy exterior. Minerals in hard water combined with soaps and shampoos can form a cloudy scum on taps. The longer the residue remains on taps, the more difficult it becomes to remove. Frequently cleaning taps maintains their aesthetic appeal and prevents unsightly buildup. Use basic soap solutions to effectively clean and restore a taps.

Special Care

Robust cleaning methods and aggressive cleaning agents may not only just damage surfaces, they can also affect the inner workings of the product.

Avoid mistakes when combating limescale and dirt: if incorrect treatment leads to damage, this is excluded from the warranty.

Never spray cleaning agents directly onto mixers or showers. Instead, spray cleaning agent onto a soft cloth and use this to wipe the surface. Thoroughly rinse mixers and showers after cleaning with clean water.

Do not use any cleaning agents containing hydrochloric acid, formic acid, chlorine bleach or acetic acid, as these can lead to significant damage.

Please follow below steps:

Fill a spray bottle with undiluted white vinegar. Spray the vinegar generously onto the faucet. Let the vinegar remain on the faucet for 5 minutes to loosen soap scum, dirt and mineral deposits.

Wipe the faucet with a paper towel to remove loose grime.

Inspect the faucet for remaining stains, scum or grime. If more cleaning is needed, fill a plastic bowl with 1/2 cup of baking soda and 1/4 cup of white vinegar. Thoroughly mix the ingredients to form a paste with the consistency of toothpaste.

Spread the paste over the faucet, using a spatula. Keep the paste on the faucet for 10 minutes.

Scrub the faucet with a nylon scouring pad to loosen remaining debris.

Dampen a soft cotton rag with warm water. Wipe the damp rag over the faucet to rinse away the paste and loosened debris.

Wipe the faucet with a terry cloth towel until completely dry.

Glazed Sanitaryware Products

Sanitaryware products are made from vitreous china. The cover and seat are made from plastic or other materials. Some toilets have a special glazed finish that helps keep the toilet cleaner longer. Whether your toilet has special glaze or not, cleaning procedure has to be followed. Do it frequently (sufficient frequency depends on usage) and use appropriate cleaning products.

Please follow below steps:

Put on protective eyewear as toilet cleaning chemicals can be very caustic. For the same reason, as well as sanitary reasons, wear rubber gloves. Open a window, if possible, for ventilation. At the least, keep the bathroom door open as cleaner fumes are toxic.

Open a bottle of non-abrasive toilet cleaner. Point the top just beneath the rim of the inner part of the toilet bowl. Squirt the product all around the inner rim.

Leave the room and let the cleaning product have ample time-check the label-to work on the toilet. If you have pets or young children at home, secure the bathroom door to prevent their contact with the cleaning chemical.

Use a toilet brush to scrub the inside of the toilet bowl thoroughly. Close the lid (to prevent splashing the chemical) and flush the toilet to rinse out the bowl.

Wet a sponge in warm water. Apply either a general bathroom cleaner or antibacterial soap to the sponge. Use this to wash the seat, the cover and other areas of the toilet.

Rinse out the sponge and wipe over the outer toilet surfaces again. This is to remove cleaner residue. You may dry the toilet's exterior with a soft towel, if you wish.

JOHNSON BATHWARE EXPERIENCE CENTERS

AHMEDABAD: HOUSE OF JOHNSON, F-106-107-108, Shivalik Plaza, Near Panjrapole Ambawadi, IIM Road, Ahmedabad, Gujrat - 380015.
